Experience

Trainee Digital Marketing Executive — **3CS** — **04/2026 - Present**

- Handle client accounts and coordinate with clients to gather requirements, clarify campaign objectives, and communicate project updates.
- Develop creative concepts for reputed client accounts and build social media and campaign strategies that strengthen their online presence and campaign performance.
- Assist with advertising budget planning, campaign setup, and performance monitoring.
- Prepare social media performance reports and analyse campaign results.
- Collaborate across teams, including designers, to develop creative assets and ensure alignment with campaign briefs.
- Maintain project progress, task statuses, and deadlines using ClickUp and Google Sheets.
- Develop and manage social media content calendars in ClickUp to coordinate content planning and execution.

Frontend Developer Intern — **AT Digital (Pvt) Ltd** — **10/2025 - 04/2026**

- Web Development & Integration: Developed and maintained functional user interfaces using React and Next.js, integrating them with headless CMS platforms like Prismic.
- Content & Design Management: Built and managed responsive, content-driven sites using WordPress, Shopify, and Prismic, ensuring seamless layouts via Tailwind CSS and SCSS.
- Quality Assurance & Testing: Performed end-to-end testing and QA to identify bugs and ensure that the final frontend deliverables aligned perfectly with the initial design and functional requirements.
- Process Optimization: Collaborated with cross-functional teams to refine component reusability and streamline the handoff process between design and development.

Software Engineering Intern — **Tecxick Software Solutions** — **01/2024 - 07/2024**

- Software Development: Developed and optimized software applications using C#, XAML, and .NET Framework, improving application efficiency and performance.
- Web Development: Designed, built, and maintained web applications using HTML5, CSS3, JavaScript, and WordPress, enhancing functionality and user experience.

- Debugging and Testing: Identified, debugged, and resolved software issues through testing and quality assurance to ensure optimal reliability and performance.
- Design: Applied UI/UX design best practices to improve user interaction, accessibility, and overall design quality.
